

SOPREM is worldwide known as a supplier of peripherie installations. Quality and tailor made solutions are our strength.

SOPREM is a family owned business with about 50 employees with more then 45 years of experience and over 15'000 delivered machines and installations.

Automation is a SOPREM speciality. For over 45 years we have designed and built tailor-made machines for our customers for the watch industry, automotive industry, building industry, medical industry, furniture industry, communications industry, aircraft industry and bicycle industry.

Especially in the watch-making industry, where we have automated many production processes. With this experience we are also able to solve your production problems in strip and wire feeding.

SOPREM builds strip feeding lines which include decoiling, straightening, feeding, accumulating, welding and rewinding of strips in all kind of dimensions.

Our linear and parallel accumulators are suitable to feed pipe production installations, as well as galvanic coating plants and colour coating plants.

We use high quality materials and the latest drive and control technology. The awareness of quality results from reliable machinery with a long operating life results in a long-term investment.
