

DECOILER - REWINDER FOR INTERLAYER MATERIAL

H30/J1/10M/L3/N1- EW/J1/N0

Solid steel base with levelling feet, movable by forklift.
Vertical aluminum column screwed to the base. Shaft mounted in height adjustable support by roller bearings.

Decoiler

- Maximum loading capacity 30 kg.
- Maximum coil outer \varnothing 800 mm.
- Two aluminium discs \varnothing 300 mm.
- \varnothing drive shaft 25 mm.
- Drive system by asynchronous motor and frequency converter.
- Scanning system by capacitive sensor.
- Maximum strip width 100 mm.
- Electrical supply 230 V / 50 Hz / 1L+N+PE.

Rewinder for interlayer material

- Maximum loading capacity 15 kg.
- 2 aluminium discs \varnothing 300 mm.
- Drive system with adjustable torque 12 – 180 N/cm.
- Speed (automatically adapts to the decoiler speed) 2 - 140 min⁻¹.
- Surveillance system for interlayer material.
